## Profile

---

Passionate Python developer with one year of experience building Telegram bots and RESTful APIs using FastAPI. Completed over ten successful freelance projects. Able to lead small teams of developers and consistently learn and implement new technologies and industry best practices. Committed to following best practices and staying up-to-date with the latest technologies and trends.

## Skills

---

Pyrogram • Fast API • Docker • Redis • SQL • Mongo DB

## Projects

---

### Nyx Shorts Maker

Nyx Shorts Maker, the Telegram bot, utilizes OpenAI's "whisper" models to generate short videos. It transcribes, identifies trending parts, adds subtitles with font options, and even translates them. Additionally, it can easily remove silent sections. Nyx Shorts Maker is a perfect tool for content creators, allowing them to enhance videos and make them more engaging and shareable on popular platforms such as Instagram, YouTube, and TikTok.

### Artemis Music

A closed-source Telegram bot that plays music and videos from multiple platforms, such as YouTube, Spotify, Deezer, Instagram, and more. The Bot uses Pyrogram and py-tgcalls for Telegram functionality, MongoDB for the database, and FFmpeg for video processing.

### Stream Wide

A streaming platform similar to Netflix that offers a wide selection of movies and series for users to watch. Fast API is utilized for the back-end, React for the front-end, Mongo DB and Redis for the database, and Scrapy for data scraping from IMDB.

### Username Attacker [🔗](#)

An open-source Telegram bot that automatically adds channel usernames to posts in various formats. It uses Pyrogram for Telegram handling and MongoDB for the database.
